

LASH EXTENSION

AFTERCARE INSTRUCTIONS

Avoid getting your lashes wet for the first 24 hours & avoid steamy showers.

Avoid applying heavy makeup.

Do not rub or touch your eyes.

Do not use curlers, they don't work on extensions!

Avoid sleeping on the face side. This is a tricky rule.

Do not try to light a cigarette on your toaster or stove-top.

Avoid chemical peels and facials.

SOME USEFUL TIPS:

- Don't touch them, particularly during the first 24 hours. The more you touch them, the more oils from your fingers get on them.
- Avoid saunas and steam for the first 48 hours.
- Don't touch them, particularly during the first 24 hours. The more you touch them, the more oils from your fingers get on them.
- Do not use facial wipes, and oil or cream-based cleansers.
- Avoid face masks, shampoo, and conditioners from coming in contact with your lashes.
- It is normal for a few lashes to drop while the adhesive is setting.
- Clean them properly, at least a few times a week with a foaming lash cleanser (after the initial 24 hours).
- Do not attempt to remove the eyelash extensions yourself. Only have it professionally removed.
- Let us know if you have any concerns or questions - we're always happy to help!

Thanks.
